\$100K+	43%

This Texas Pulse Poll was conducted by ReconMR from June 1 - 4, 2026, among 807 Likely Texas Voters. Of the 807 respondents, 807 were contacted through a dual frame (landline and cell phone) mode. Telephone calls were conducted in English and Spanish and respondent sampling was initiated by asking for the registered voter by name. The landline telephone sample and the cell phone sample was obtained from L-2 database of registered voters.

All coding of open end responses were conducted by human coders.

Data from collection modes were weighted to balance sample demographics to match estimates for Texas's population using data from the state voter file, on age, region, race/ethnicity, education, PartyID identification, a combined measure of stated and derived vote likelihood, and gender to ensure representativeness. It has an overall margin of error of +/- 4 percentage points including the design effects resulting from weighting. Sampling error is only one of many potential sources of error and there may be other unmeasured error in this or any other public opinion poll.

ReconMR conducts political, economic, social, and cultural research across the United States. ReconMR, an independent, non-partisan research institute, subscribes to the American Association of Public Opinion Research Code of Professional Ethics and Practices
